

NOVI GOLDEN LINE G420 NEW GOLDEN LINE G420

TEHNIČKI PODACI:
Dužina: 4,2 m
Širina: 2,0 m
Prečnik tubulusa: 48 cm
Broj putnika: 6
Preporučena snaga motora: 40 KS
Maksimalna snaga motora: 60 KS

TECHNICAL SPECIFICATIONS:
Length overall: 4.2m
Width overall: 2.0m
Tube diameter: 48cm
Passenger capacity: 6
Engine recommended: 40 HP
Engine max: 60 HP

Podjednako dobar i kao pomoćni čamac visoke specifikacije ili porodični čamac srednje veličine

Equally at home as a high specification tender or mid-size family runabout

Sa zadovoljstvom vam predstavljamo novi G420, najnoviji u seriji Golden Line. Dizajn prati dobro poznatu Grand savremenu filozofiju svetlog, dinamičnog izgleda i aerodinamičkih linija. Iako ispunjava zahteve specifičnog tržišta luksuznih tendera srednje veličine, ovaj model, sa svojim klasičnim prostornim rasporedom, jednako se dobro kotira i kao porodični čamac odličnih karakteristika.

Dokazani High Step Hull dizajn obezbeđuje izvrsnu manevarsku sposobnost u kombinaciji sa dinamičnom stabilnošću i impresivnom brzinom. Kao i kod svih modela u seriji Golden Line, G420 je opremljen sa duplalom letom standardne opreme i širokim spektrom dodatne opreme uključujući i 55 litarski ugrađeni rezervoar za gorivo, što će poboljšati autonomiju plovila i doprneti njegovoj jedinstvenoj individualnosti. Iako je kraci, čamac ima isti kapacitet putnika (6 osoba) kao i veći model G480 i ovo nije jedina zajednička karakteristika ovih čamaca. Kao standardna karakteristika, na raspolaganju je tradicionalni pramčani stepenik sa dva privrznika. Montiranjem opcionog kompleta moguće je proširiti sedišta za pramčani deo u prostor za opuštanje ili sunčanje.

50 NAUTIKA

We are delighted to introduce the new G420, the latest in the Golden Line Series. The design follows the well-established Grand contemporary philosophy with a bright, dynamic appearance and aerodynamic lines. Whilst filling an important niche in the mid-size luxury tender market this model, with its classic layout, performs equally well as a high specification family runabout.

The proven High Step hull design ensures excellent maneuverability combined with dynamic stability and impressive speed capability. As with all models in the Golden Line Series, the G420 is equipped with a comprehensive list of standard equipment plus a wide range of accessories including a 55 liter built in fuel tank that will enhance the boats range and add to its unique individuality. Despite its shorter length, the boat has the same passenger capacity (6 persons) as the larger G480. And this is not the only common feature these boats share. As a standard feature, there is the traditional bow step plate complete with two mooring cleats. By fitting the optional kit it is possible to extend the bow seat into a useful sun deck for relaxing or sunbathing.

Upravljačka konzola je u suštini glavni funkcionalni centar čamca. Uprkos relativno kompaktnim dimenzijama, instrument tabla ima proširenu funkcionalnost. Ispod elegantnog aero ekrana moguće je instalirati ploter za mape sa dijagonalom do deset inča, plus audio opremu. Što će poboljšati vaše uživanje u brodu.

Kontrolna tabla ima dovoljno prostora za razne instrumente, uključujući brzinomer, tahometar, merilaše goriva i temperature.

Upravljačka konzola je nagmota pomalo unazad. Što naglašava spektakularnu siluetu ovog plovila i obezbeđuje dovoljno prostora za kapitanove noge, kao i prostor za sedenje za putnike.

Ispred konzole nalazi se ugrađeno jedno sedište sa velikim prostorom za skladištenje ispod njega.

Optimalni profil visine aerodinamičkog stakla pruža odličnu zaštitu od vetra za kapetana, a moderni držači od nerđajućeg čelika na bočnim stijenama konzole obezbeđuju dodatnu sigurnost.

Kao i svim GRAND čamcima, vodilo se računa da se obezbedi dovoljno prostora za skladištenje. Iste ni model G420 nije izuzetak. Ovaj čamac ima dovoljno prostora za skladištenje opreme tako da ni najzahtevniji korisnik neće imati problema sa nedostatkom prostora.

Zadnje dvostruko sedište je udobno i funkcionalno. Nakon im ugrađen V oslonac za vrat koji pruža ugodno stajanje i ogled (slično nekim modelima superautomobila). Zakrivljeni nerđajući rukohvat levo od sedišta može biti posebno koristan kod praćenja skijasa u vodi. Sličan rukohvat je obezbeđen na stani komandira.

Prostorni zadnji odeljak je odseparisan, sa gasnom oprugom, pruža dovoljno prostora za pribor, sigurnosnu opremu i ostale važne stvari koje nodu svu put na naše čamce!

Dostupan je i deo za vuču skijasa, tako da možete uživati u skijanju na vodi ili vakeboardingu.

Se 80 ks varijetadnih (maksimalnih) performansi, bice spektakularan (u odgovarajućim uslovima) što će vam omogućiti veliko zadovoljstvo brzih prelazaka u ovom sigurnom RIB-u lakom za manevaranje!

The steering console is essentially the main functional center of the boat. Despite its relatively compact dimensions, the dashboard has an expanded functionality. Below the stylish aero screen it is possible to install a chart plotter with a diagonal of up to nine inches plus audio entertainment equipment, which will enhance your enjoyment of the boat.

Dashboard has plenty of space for a variety of instruments including a speedometer, tachometer, fuel and temperature gauges.

The steering console is tilted slightly backward, emphasizing the spectacular silhouette of the boat and providing enough space for the pilot's legs and a number of seated passengers.

To the front of the console there is a built in single seat with spacious storage space below.

The optimum height profile of the auto screen provides excellent wind protection for the pilot and the stylish stainless steel handrails on the sides of the console is a particularly useful safety feature.

As in all GRAND boats, provision of ample storage space is important and the G420 model is no exception. This boat has sufficient locker space to store gear and accessories so problems with lack of space should not arise even for the most demanding users.

The aft double seat is both comfortable and functional. The backrest incorporates a V-neck feature providing a rather distinguished appearance similar to some supercar designs. The curved stainless handrail to the left of the seat may be especially useful when observing a water skier. A similar handrail is provided on the pilot's side.

The spacious rear storage compartment, with gas spring, provides plenty of space for accessories, safety equipment and all those other important items that find their way onto our boats!

A water ski towing mast is also available so you can enjoy water skiing or wakeboarding.

With a 80hp outboard (max) performance will be spectacular (in appropriate conditions) allowing you to obtain great pleasure from high-speed trips in this safe, seaworthy and very maneuverable RIB.

VIŠE OD 70 PLOVILA NA LAGERU!
GARANCIJA - DO 5 GODINA!
