QUARANTACINQUE T

OPEN SKY · LIGHT · DAY CRUISING

Engineering you feel. Performance you trust.

Vertex Yachts

QUARANTACINQUE SERIES · T-TOP

Engineered at the Apex

The **V** in the Vertex mark reflects the Ranieri shipyard coordinates at **Soverato · 38.41° N · 16.33° E** — the geographic point where every hull is engineered and laminated.

Vertex Yachts inherits sixty years of Ranieri International boatbuilding — evolved with **Vertex Carbon Composite Hull** technology, proprietary FDCS, CSA and H.I.S. systems. Quarantacinque TT shares the same 14-metre platform with a distinct personality: open sky, light and essential day cruising.

SECTION

Full height 191 cm in lobby, bathroom and owner cabin · 140 cm in aft guest cabin

LAYOUT A

LAYOUT B

PROFILE

DECK PLAN

Life on board

Essential day cruising at sunset

Athletic profile

Contemporary lines · controlled reflections

Bow deck

Generous side passages and forward sunpad

Room to live aboard.

Command console

Driver-focused helm with panoramic visibility and intuitive controls — every detail ergonomic, every instrument exactly where it belongs.

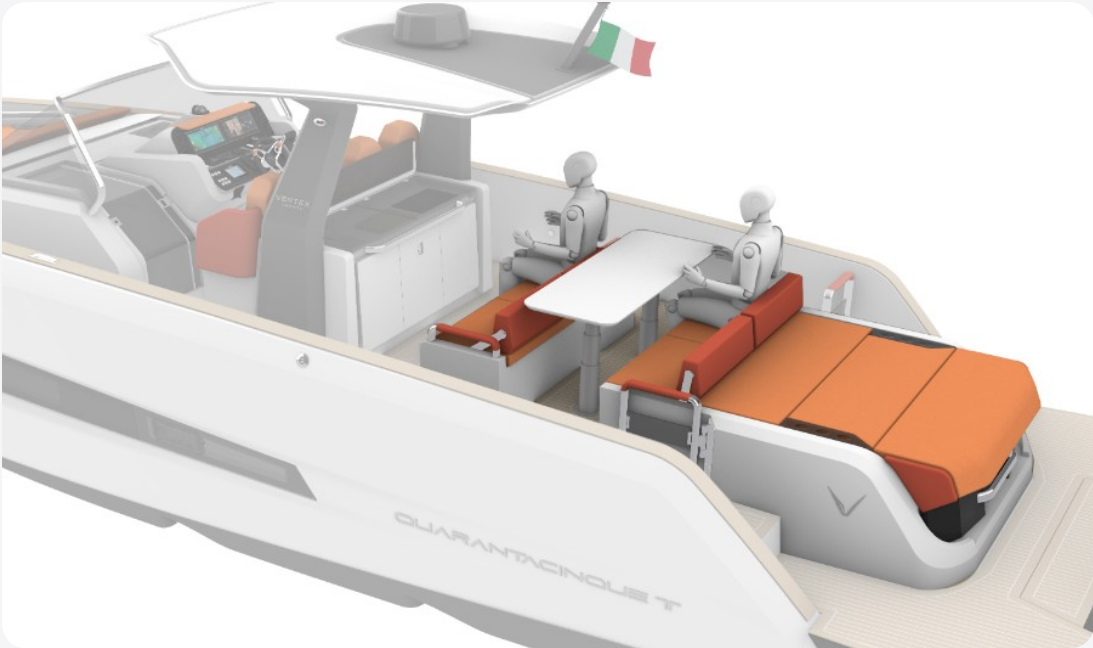

Generous walk-around

Wide side decks: more freedom of movement, more safety with guests, more space to enjoy every area of the deck.

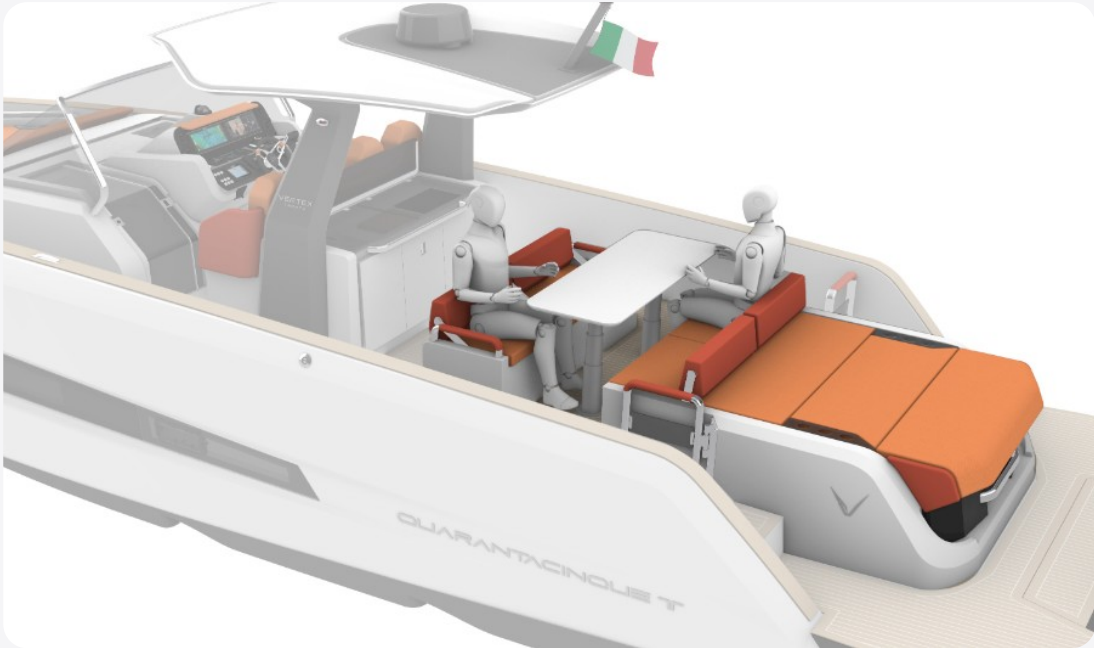

Cockpit & Dinette

Main deck social area under T-Top

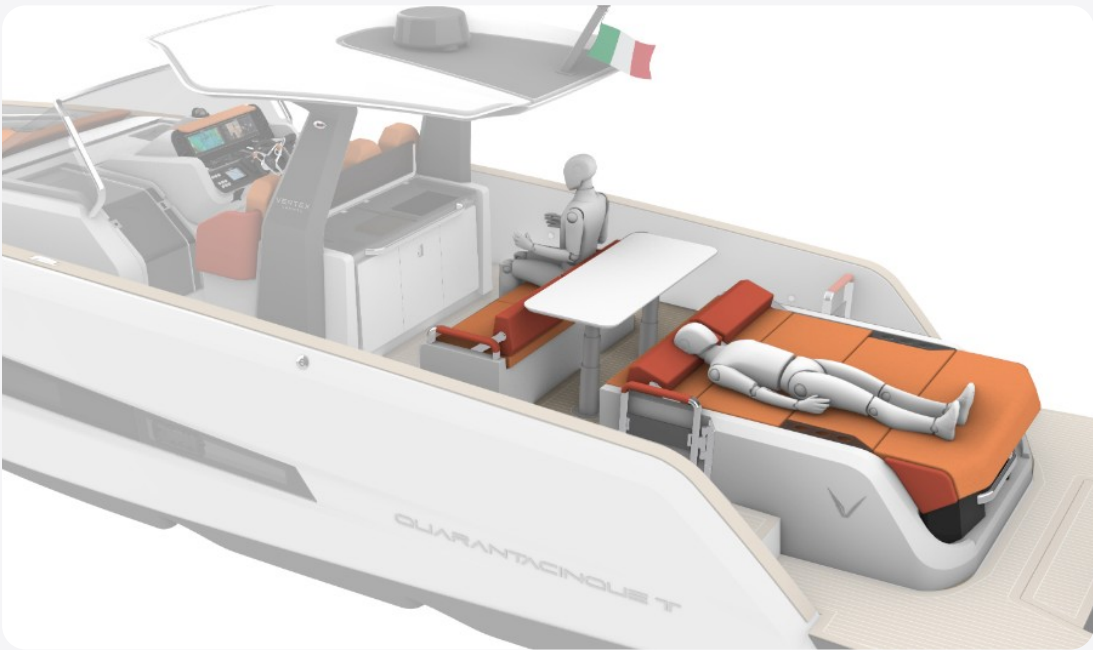

SOCIAL

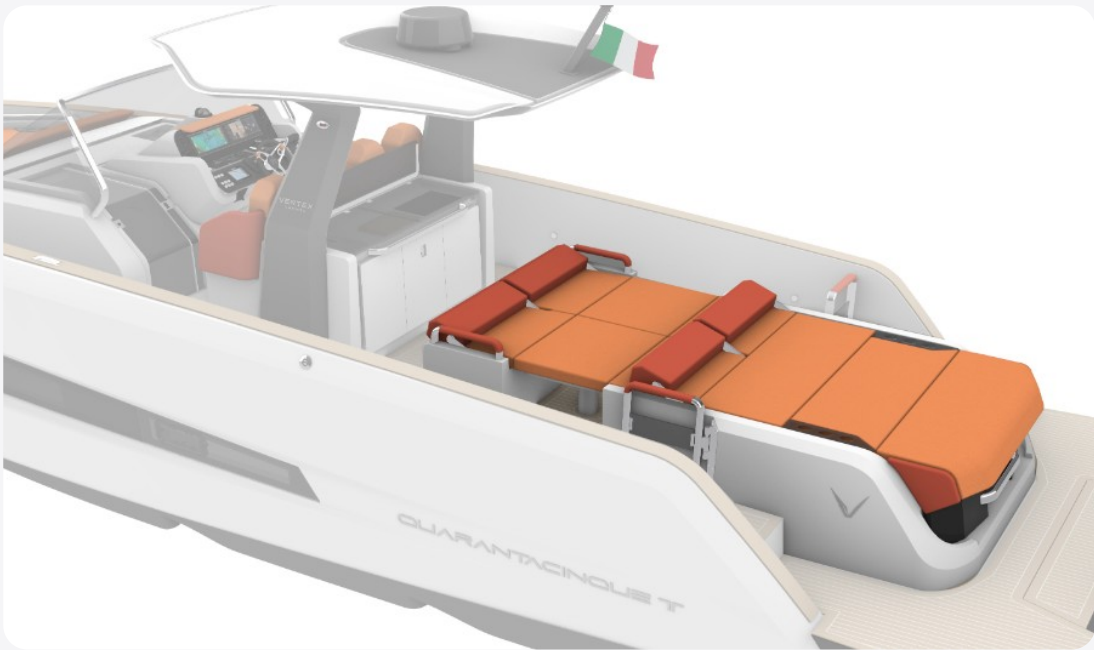

DINETTE

SUNBED

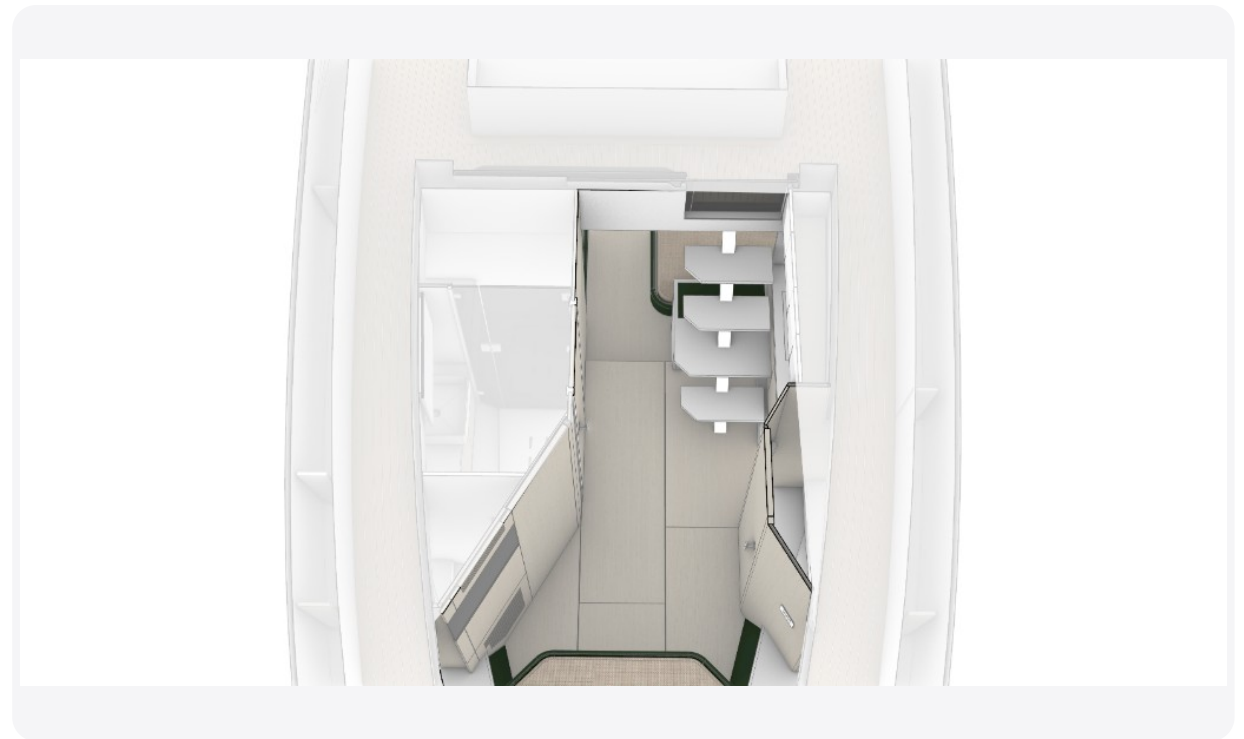

AFT LOUNGE

ICONIC FEATURE

Double Magic Door

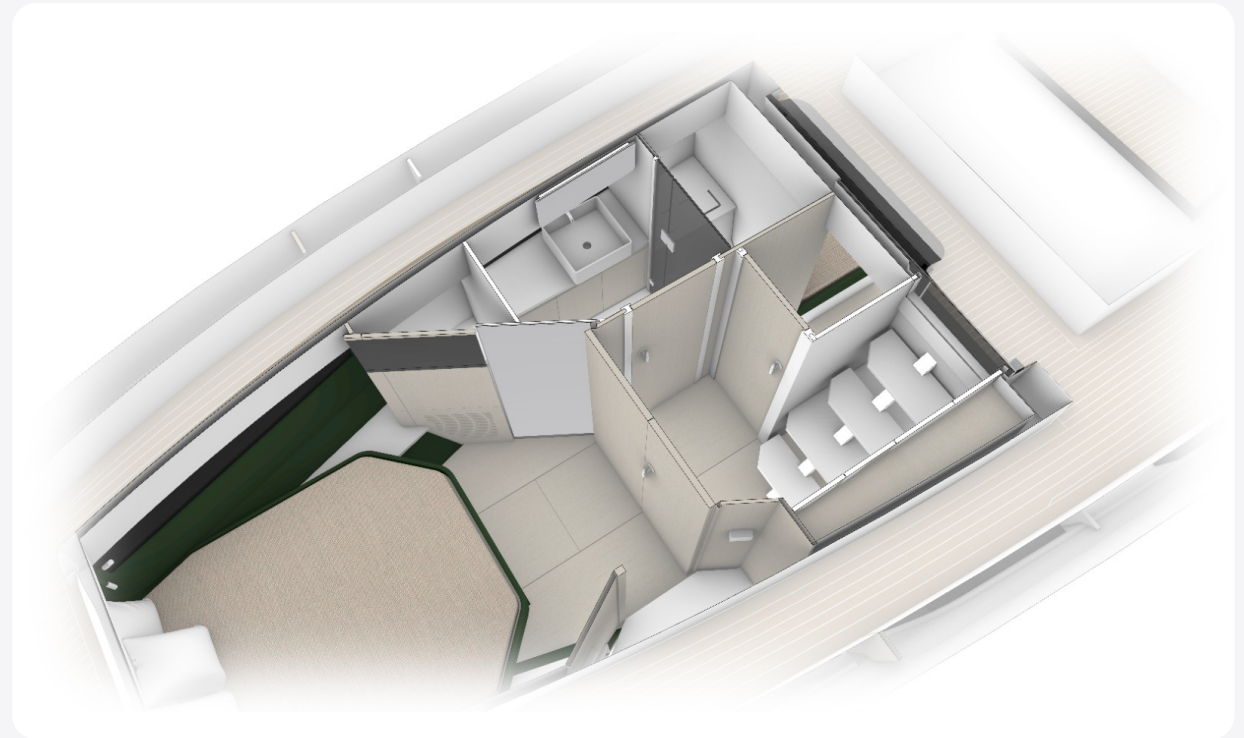

The owner cabin features two doors disappearing inside lateral partitions — giving access to a mirror and wardrobe when closed.

OPTIONAL · LAYOUT B

Privacy Door

Option B adds aft cabin partition and door for independent night-zone privacy.

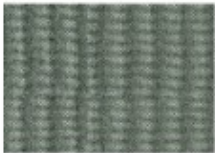

Color & Trim Moodboard

Sunbrella fabrics · Rancati Prodigy · Alpi wood · Gelcoat finishes — curated palette for bespoke interiors and deck upholstery.

Lobby + Dinette

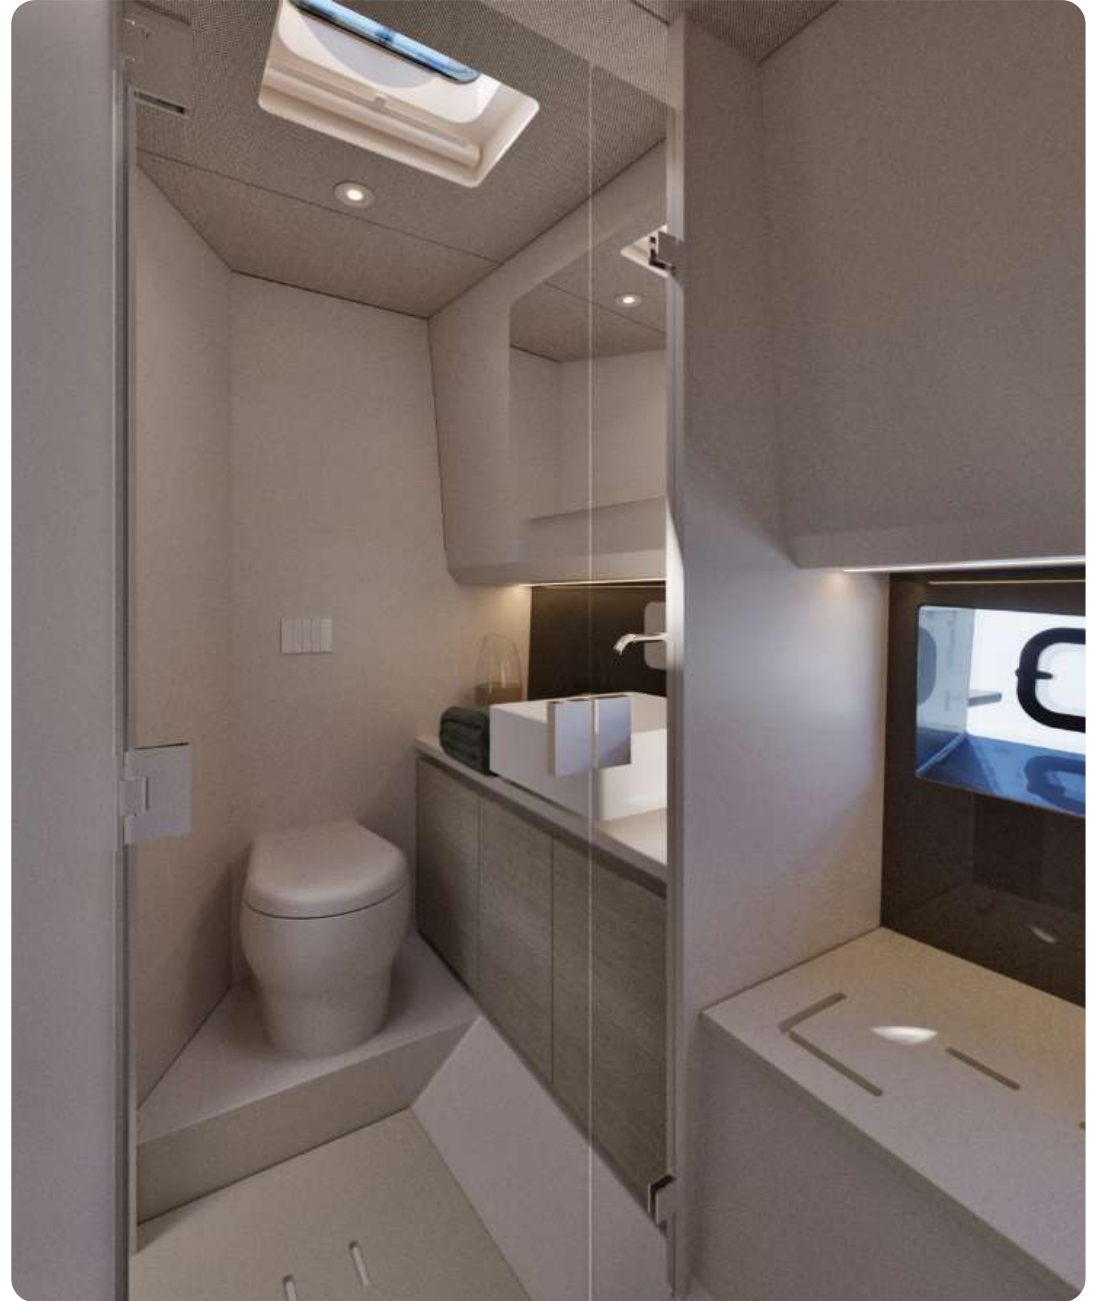

Main cabin entrance and dinette area

Aft Cabin

Twin guest berths · optional privacy partition

Bathroom

Full-height shower and vanity

Interior

Carbon positioned with purpose.

Vertex Carbon Composite Hull (VCC) combines E-Glass stratification with structural carbon reinforcements exactly where load, stiffness and torsion demand it — engineered and laminated in a climate-controlled environment in Soverato.

HULL · VCC

Vertex Carbon Composite Hull

Stronger — stiffness where the hull works hardest

Controlled — climate-controlled lamination in Soverato

Lighter — optimised weight for planing and efficiency

Serviceable — strategic carbon placement, not full-carbon throughout

STRUCTURE

FDCS

Fully-Developed Cockpit System — deck, cabin floor and technical volumes integrated as a single monocoque element.

COMFORT

CSA

Cockpit Shock Absorber — elastic elements between hull and deck absorb wave motion and reduce vibration at the helm.

PERFORMANCE

H.I.S.

Hull Innovative System — ventilated hull for rapid planing, neutral trim, reduced drag and stability in heavy seas.

Carbon where it matters. Systems where you feel the difference.

Engineering you feel. Performance you trust.
